SUMMARY

Full-stack developer specializing in **React**, **Next.js**, **Node.js**, and **Laravel**, currently building a complete event & ticketing platform from scratch at a Qatar-based startup. Four internships across full-stack, AI, and SaaS development. Graduating June 2026. Actively seeking remote full-stack roles or relocation opportunities. Fluent in English, proven ability to ship production-ready products independently.

WORK EXPERIENCE

Full-Stack Developer Intern (PFE) – United Systema, Qatar

Feb 2026 – Present

- Built **GetSeat** (getseat.dev) from scratch — a complete event platform comparable to seats.io, launching in June 2026.
- Developed an interactive **drag-and-drop seat map editor** with zone management and complex geometry.
- Implemented **real-time seat locking** via WebSockets to prevent double-booking across concurrent users.
- Built a full **ticketing system, event management dashboard, and reservation flow** end-to-end.
- Created an **embeddable iframe SDK** with documentation — any platform integrates seat selection in minutes.
- Set up **CI/CD pipeline** on DirectAdmin for automated deployment.
- *Stack: NEXT.js, Laravel, PHP, WebSockets, REST API, MySQL, DirectAdmin*

Software Engineering Intern – AudaSoft (Remote)

Jul 2025 – Aug 2025

- Contributed to backend of an **AI-powered SaaS platform** automating content creation for WordPress and Shopify.
- Built and optimized backend services in **Go (Gin)** handling AI content generation pipelines.
- Integrated CMS platforms via **REST APIs and custom plugins**; improved admin dashboard features.
- *Stack: Go (Gin), TypeScript, Vue.js, MongoDB*

Full-Stack Developer Intern – VIEWS Digital Agency, Sousse

Jun 2025 – Sept 2025

- Designed and built a **modern admin dashboard** for an internal e-commerce management platform.
- Developed **REST APIs** with Node.js/Express, optimized MongoDB queries, integrated role-based access control.
- *Stack: React, Node.js, Express.js, MongoDB*

AI Engineering Intern – DivaSoftware, Sousse

Jun 2024 – Jul 2024

- Built an **OCR pipeline** using PyTesseract and pdf2image to automate invoice data extraction.
- Developed a **REST API** in Express.js exposing structured JSON from invoice images/PDFs.
- *Stack: Python, PyTesseract, Express.js, React, MongoDB*

PROJECTS

SmartShop — Full-Stack E-Commerce Platform [[GitHub](#)]

2025

- Full e-commerce platform: storefront, cart & checkout, admin dashboard, JWT auth, product management.
- Scalable REST APIs in Node.js/Express with MongoDB; deployed via GitHub Actions and Render.

LLM Liver Cancer Research Chatbot

2024

- AI chatbot using **Mistral LLM** and **SapBERT** biomedical embeddings to support medical researchers.
- React frontend integrated with Hugging Face API.
