Professional Summary

Full-stack software engineer specializing in real-time systems, scalable SaaS architecture, and cloud-native deployment. Experience delivering production-grade full-stack systems across realtime SaaS, AI workflows, and automation platforms.” – from ticketing platforms and AI content pipelines to OCR automation and e-commerce. Experienced in designing API-driven systems, realtime synchronization workflows, and deployment automation across SaaS and AI-powered platforms.

Work Experience

Full-Stack Software Engineer (PFE)

United Systema, Qatar

Feb 2026 – Present

- Architected and developed **GetSeat**, a real-time ticketing and seat-management platform with WebSocket-based seat locking, interactive drag-and-drop venue designer, and embeddable iframe SDK – launching June 2026.
- Implemented end-to-end reservation, ticketing, and checkout workflows, eliminating double-booking scenarios across concurrent user sessions.
- Built a full REST API and SDK documentation, enabling third-party platforms to integrate seat selection within minutes without backend changes.
- **Technologies:** Next.js, Laravel, PHP, WebSockets, REST API, MySQL, DirectAdmin, CI/CD

Software Engineering Intern

AudaSoft (Remote)

Jul 2025 – Aug 2025

- Developed and optimized backend services in Go (Gin) for an AI-powered content generation platform, improving asynchronous pipeline throughput and reducing latency.
- Integrated WordPress and Shopify via custom REST plugins, enabling seamless content publishing for hundreds of active users.
- Enhanced admin dashboard features and database query performance (MongoDB).
- **Technologies:** Go (Gin), TypeScript, Vue.js, MongoDB, REST APIs

Full-Stack Developer Intern

VIEWS Digital Agency, Sousse

Jun 2025 – Sept 2025

- Designed and built a secure internal admin dashboard with role-based access control (JWT), Node.js/Express REST APIs, and a React frontend – adopted for daily operations.
- Optimized MongoDB aggregation pipelines and indexing, significantly reducing peak query response times.
- **Technologies:** React.js, Node.js, Express.js, MongoDB

AI Engineering Intern

DivaSoftware, Sousse

Jun 2024 – Jul 2024

- Developed an OCR pipeline (PyTesseract, pdf2image) to automate invoice data extraction, exposed as a REST API (Express.js) – reduced manual processing from hours to minutes.
- Applied image preprocessing (deskew, binarization) and validation rules, achieving high accuracy on thousands of test invoices.
- **Technologies:** Python, PyTesseract, Express.js, React.js, MongoDB

Key Projects

- Built a production e-commerce platform with cart, checkout, JWT authentication, product management, and admin dashboard using Node.js/Express and MongoDB.
- Automated deployment via GitHub Actions and cloud hosting (Render), supporting concurrent sessions without performance degradation.
- **Technologies:** Node.js, Express.js, MongoDB, JWT, GitHub Actions

LLM Liver Cancer Research Chatbot

2024

- Developed an AI-powered biomedical research assistant using Mistral LLM, SapBERT embeddings, and Hugging Face inference API with a React frontend – improved semantic query accuracy for domain-specific medical literature.
- **Technologies:** Python, Mistral, SapBERT, Hugging Face, React.js

Leadership

Team Lead → Mentor

*Google Developer Student Clubs, ENET'Com**Sep 2024 – Jun 2025*

- Led a team of 20+ organizers and a community of 300+ student developers, organizing weekly workshops on web development, cybersecurity, and machine learning.
- Managed sponsorships, speaker coordination, and operational logistics for technical events with 200+ attendees.
- Currently serving as a mentor, guiding students on software engineering and career development.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, PHP, Go, C++**Frontend:** React.js, Next.js, Vue.js, Tailwind CSS, Redux, HTML5/CSS3**Backend:** Node.js, Express.js, Laravel, Symfony, REST APIs, WebSockets**DevOps & Cloud:** Docker, GitHub Actions, CI/CD, AWS (EC2, S3), Linux, Git**Databases:** MongoDB, MySQL, Firebase**AI/ML:** OpenAI API, Hugging Face, Mistral, SapBERT, OCR (Tesseract, EasyOCR)

Education

ICT Engineering Degree – ENET'Com (National School of Electronics & Telecommunications), Sfax
2023 – 2026**Preparatory Engineering** – IPEIEM El Manar, Tunis

2021 – 2023

Languages

Arabic (Native), English (Fluent), French (Professional)
